

Jell-O in the Snow

If your family would like to try it, you will need:

- 1 box of any-flavored Jell-O (or other brand)
- Individual plastic cups.
- Fruit - sliced, diced or chunked (optional)

All you will need to do is:

1. Prepare Jell-O according to package directions.
2. Leave the Jell-O in the mixing bowl or portion it into individual cups.
3. Add fruit to Jell-O (optional).
4. Instead of putting it in the fridge to set, try putting the Jell-O outside on a cold Winter's day.

Try some Jell-O Experiments:

- Put one container of Jell-O in the fridge and one outside. Which one sets up first?
- See how long it takes for the Jell-O to set in the snow vs. out in the open (Snow acts as an insulator, so that one should take longer).
