

Fruity Fossils - Scented Play Dough

This is a non-edible recipe

If your family would like to try it, you will need:

1 1/8 cup flour

1/2 cup salt

1/2 cup water

1 packet Kool-Aid (or other brand)

2 T. cooking oil

All you need to do is:

1. Combine all dry ingredients in a bowl. Stir.
2. Add cooking oil and water. Stir.
3. When the dough is the consistency of bread dough, remove it from the bowl and knead it until firm.
4. To make fossils, use a variety of objects (we used seashells and toy dinosaur bones) to make impressions in the dough.
5. Allow to air dry for several days on wax paper - turning over each day.
6. To use as play dough, store in Ziploc bag (or other brand) or an airtight container.

Note:

To have enough dough for a class of 16, our class made 4 batches of dough using four different flavors of Kool-Aid.
