

Puffy Paint

This is a non-edible recipe

If your family would like to try it, you will need:

- Shaving cream
- White glue
- Food coloring (optional)
- Painting utensil - paint brush, craft stick, etc.

All you need to do is:

1. Mix equal portions of shaving cream and white glue.
2. Add a few drops of food coloring.
3. Let the mixture set for 2 minutes.
4. Paint using a paint brush or other tool.
5. If mixture loses its "puff," just add more shaving cream.
6. Allow to dry overnight. Your painting will stay puffy throughout the drying process!

Variation:

- Dip foam balls into un-colored puffy paint mixture to create snowmen or other snow-like sculptures.
